

Dear Sirs:

As a subscriber to XM Radio, I strongly urge you not to allow the NAB to undermine the new satellite technology. At long last, the listener has a real choice, and we're willing to pay for it. For this reason, I have been hoping to see MORE choices on satellite radio, not fewer; MORE local programming, not less!

Rather than change their own business model, the members of the NAB are trying to squelch innovation.

Please protect satellite radio!

Sincerely,

Mary Shulman
